502-389-7866

Highly motivated and results-oriented developer with 8+ years of experience building user-focused digital experiences across diverse platforms. Proven ability to translate designs into functional and accessible interfaces, with a strong foundation in core web technologies and experience adapting to new frameworks and environments. Dedicated to writing clean, efficient code and eager to contribute to collaborative teams.

Work Experience

Front-End Developer
Feb 2022 - Oct 2024
CQL

Developed and maintained high-performance e-commerce solutions using HTML, CSS, JavaScript, React, Redux, Next.js, and TypeScript

- Built and optimized front-end components and user interfaces, focusing on performance and scalability
- Led accessibility initiatives, ensuring WCAG compliance and inclusive user experiences
- Collaborated with back-end developers on API integration to improve data flow between client and server
- Developed custom themes, discount apps, and SFRA storefronts for Shopify and SFCC, creating unique online store experiences

UI Developer
Jun 2016 - Feb 2022
Radancy

Developed responsive and accessible branded career sites using HTML, SCSS, JavaScript, Razor, and a custom CMS

- Collaborated with cross-functional teams (creative, UX, project management) to deliver innovative web solutions for global clients
- Implemented website layouts from mockups, prioritizing responsive design, cross-browser compatibility, and attention to detail

Technical Consultant
Jul 2015 - Jun 2016
Perficient

Provided technical solutions and implemented website customizations

- Developed interactive website prototypes using HTML, CSS, and JavaScript for UX research and testing
- Implemented and customized WordPress themes and integrated analytics
